

IGNITION DEVELOPMENT ROADMAP 2014-2015

Inductive Automation's Software Development Roadmap Revealed at the 2014 Ignition Community Conference

ENTERPRISE ADMINISTRATION MODULE

Manage multiple Ignition installations more efficiently across large enterprises.

UPGRADED REPORTING MODULE

A full-fledged stand-alone reporting solution with automatic scheduling/triggering and delivery.

DNP3 DRIVER MODULE

Communicate using the Distributed Network Protocol, the Ignition community's most-requested device protocol.

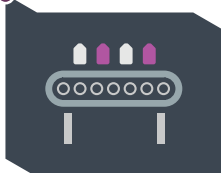

BEYOND IGNITION v7.8

Improved mobile experience and scalability, including multiple-Gateway connectivity.

v7.8

WORK IN PROCESS (WIP) ADDITION TO TRACK & TRACE

Manage and track work in process on the plant floor. Schedule production across multiple lines and machines.

OEE INTEGRATION WITH TRACK & TRACE

Add Overall Equipment Effectiveness functionality to the Track & Trace Module.

MAINTENANCE MANAGEMENT MODULE

Track and trigger maintenance work orders, manage spare and replacement parts inventory, and much more.

SPC INTEGRATION WITH TRACK & TRACE

Add Statistical Process Control functionality to the Track & Trace Module.

MES ENTERPRISE MANAGEMENT MODULE

Manage and analyze MES production information across multiple servers.
